About Splendid Freight International Ltd.

Splendid freight international limited was established in 2015 from a strong desire to offer top-notch, bespoke logistics solutions that add value and support the success of its clients.

We currently have our business premises in Lagos, Abuja & Portharcourt respectively and anticipate further expansion to other remote locations.

We are a part of a global network of providers and partners. This synergy enables us function effectively and efficiently across global locations; picking up cargo and transporting them with ease.

All of Nigeria's seaports and significant international airports are serviced by Splendid Freight.

Our team makes it a point of duty to fully comprehend each client's needs before offering the optimal solution.

We ensure to work closely with you to design options that are most appropriate for your shipment.

Mission

To provide our clients complete and specialized logistics solutions for the improvement of their supply chains.

Philosophy

We guarantee open lines of contact and prompt managerial action. Strive for excellence and continuously improve utilizing international best practices.

Vision

To improve the supply chain for our clients while being a reliable 3PL provider to them. Making it easy for everybody involved.

Business Domains

To expand activities focusing on logistics to assist industries and consumer services

Management Policy

To take on the challenges of innovation and to adapt to market demands as a diverse and all-encompassing trade organization.

Action Guideline

To provide customer satisfaction while acting lawfully and ethically, and with creativity, innovation, honesty, and thankfulness.

Core Values at Splendid Freight

- Professionalism
- Friendship
- Courtesy

- Quality
- Reliability
- Continuous improvement

Logistic devision

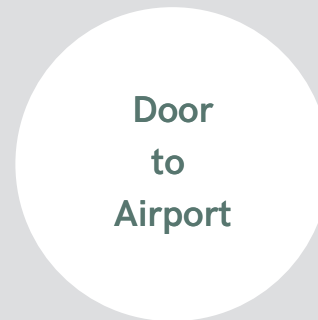

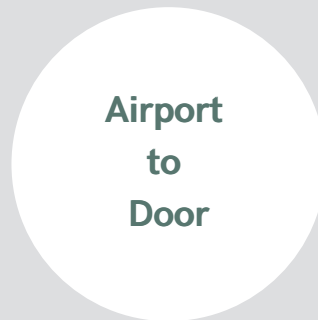

We provide clients third party logistics (3PL). Due to our strong worldwide network, wealth of knowledge and expertise, we are able to provide solutions that align with our customers' production and supply framework.

In order to help customers, create an entire supply chain, we provide hybrid commercial distribution and logistics service that combine tasks involving packing, disassembly, warehousing, and transportation with distribution tasks inclusive of product order receipt and placement, procurement, inventory management, and sales activities.

Air Cargo

Our global network enables us to carry out air freight operations with ease. You can rely on us for dependable, first-rate and completely customized services that are tailored to your demands.

Our models for aifreight services:

Sea Cargo

Cargo weight is not a challenge for us. We have the expertise to move any form of cargo, be it heavy or light across various locations. We are known to handle diverse cargo forms, be it containerized, break bulk, oversized or project freight.

You may use our professional knowledge and connections with different ocean ships to move your goods by sea as a Full Container Load (FCL) or Less Than Container Load from any location in the globe to Nigeria and vice versa.

Our ocean freight models include:

Trucking

At some point throughout the shipping process, cargo must be transported by truck. Splendid Freight offers container transportation, full load trucking, and dedicated trucking services throughout Nigeria and the West African Coast. We work well with a lot of trucking firms. We are aware of the numerous Customs border stations along the West African routes and the dynamics of the various routes in Nigeria and along the coast of the continent.

Reverse logistics

Reverse logistics is now required because of the escalating environmental concerns and the improvement in green supply chain management techniques and practices. Reverse logistics management will contribute to our manufacturing clients' sustainability initiatives by lowering production material costs, increasing productivity, and boosting the consumer experience.

We can effectively handle the shipping of defective products and parts from customers to manufacturing facilities or distribution centers for the purpose of testing, disassembling, repairing, recycling, or the proper disposal of products that cannot be recycled or reused. Our goal is to optimize or make the aftermarket supply chain activity more efficient.

Customs Clearance

For our clients, we manage Customs processes at Splendid Freight. Almost every product has been a subject of our experience. Whether you need help with import, transit, or export requirements, we can help.

Warehousing & Storage

We at Splendid Freight are aware that storage can occasionally be difficult. For as long you might need it, we can offer you storage.

We can offer you high-quality warehouse and storage services with unique requirements on temperature, safety, and customs processes if necessary, regardless of the product range you are in. Your items can be kept with us in their original packaging until further notice.

This can comprise containers in a container yard, palletized units in a warehouse, or any other type of storage that may be necessary.

EXTRA SERVICES

ATM Solutions

A bank's decision to deploy ATMs should be logical as well as profitable which provide greater convenience and cover a larger market area with maximum customers. The goal is to maximize the total number of machines deployed covering all the customer demands in the selected area. On the whole we cover the following major areas:

ATM
Deployment

ATM
Staging

Supply of
ATM
spares

Civil
Works
for ATM

Technical
Support
for
ATMs

ATM Solutions

At Splendid Freight, we have taken a different path in a quest to eliminate the payment card and PIN; they have developed a staged transaction process using the customer's mobile phone. While there are some variations from bank to bank, the process generally works as follows:

- The customer opens the mobile banking application using the normal authentication process
- The customer selects the ATM withdrawal option then identifies the ATM location and amount of withdrawal
- When at the designated ATM, the customer selects the function button on the ATM for a cardless transaction
- The next step depends on the particular bank
- Some banks display a 2D barcode on the ATM screen, which the mobile phone's camera reads to validate the transaction and dispense the requested amount of cash
- Other banks, to complete the transaction, may require the customer to enter both the normal payment card PIN and a numeric token value that the application sent to their phone when they made the transaction selection

This technology offers banks a number of financial benefits over biometric readers. The barcode or token process requires only software development within the mobile banking application and ATM, so banks don't have to purchase, install, and maintain biometric hardware sensors.

Leading the Freight Forwarding Innovation

We deal with a wide range of products from the following sectors:

Our Unique Value Proposition

A logistics partner must be scalable and have the ability to handle significant demand. Splendid Freight provides services that are intended to increase productivity throughout the whole supply chain. As an established 3PL partner, we work to streamline the freight logistics procedures. Your requirement for prompt product delivery may be met by our value offer, which includes but is not limited to the following:

- We can manage all import and export paperwork on the client's behalf as needed
- We also offer guidance on product categorization and duty rates
- We offer daily updates on the shipment's progress and real-time visibility
- We discuss and report events that occur along delivery lines
- We strive to deliver shipments to customers as cheaply as possible while ensuring prompt pickup and clearance of both air and sea freight
- We also run a continual service improvement system

A Reliable 3PL Provider for Your Business

In addition to the more common logistics tasks including transport, warehousing, material handling, packaging, distribution processing, and logistics information processing, business logistics also contains several strategic elements. We place an emphasis on strategic functions (planning, forecasting, and analysis) to satisfy the global logistics demands driven by our clients' supply and demand chains.

The packing technique of Splendid Freight has continually improved since it was founded.

Our experts, who are knowledgeable in various industries, will provide the best packing options, which improve the effectiveness of shipping and lower expenses. In order to do this, Splendid Freight looks at customer logistics from the customer's perspective and develops an ideal solution with them.
